

08-04-24

Good afternoon-

I have been reading the nature recovery part on your website and thought I would let you know what we have done.

Over the past 5 years or so we have installed 3 owl boxes, 1 with a camera. 2 are in trees and one in my workshop. We've had barn owls nesting, little owls nesting, kestrels nesting, and Tawny owls caught on the camera. We did this after I spoke to one of the guys taking pictures on the lane of wildlife.

After speaking to him I asked him if he would like to come to the farm as he might see the barn owls he was looking to take pictures of. We went from there. He's a lovely guy.

We have also built a rather large bug hotel out of pallets, roof tiles etc.

If you would like we could keep you updated on anything else we do so that you may add it to your records.

Thank you
